SUMMARY

4th-year BSIT student specializing in full-stack web development with hands-on experience building and deploying production-ready applications using Laravel, Vue 3, React, TypeScript, and REST APIs. Comfortable with complex scopes — multi-role ERPs, real-time systems, and Android companion apps. Passionate about solving practical problems through software.

SKILLS

Languages: PHP, JavaScript, TypeScript, HTML, CSS, SQL

Frameworks / Libraries: Laravel, Vue 3, React, Three.js, Tailwind CSS, Capacitor, Flutter, Vite, Axios, Leaflet.js, Riverpod

Tools: Git, GitHub, Figma, Composer, npm, Pusher, PayMongo, Webhooks

Databases: MySQL, PostgreSQL

Concepts: REST APIs, MVC, SPA Architecture, ERP Systems, Role-Based Access Control, Real-time WebSockets, OTP Authentication, Android App Deployment, 3D Web Rendering

PROJECTS

Cavite Moto-Tech Hub cavitemototech.ogm1.com

Laravel, Vue 3, Three.js, Tailwind CSS, shadcn/ui, MySQL, Capacitor, PayMongo, Pusher, Sanctum

- Built a full-stack ERP platform for motorcycle shops with 7 user roles covering the complete business lifecycle — inventory, bookings, service management, finance, and staff
- Implemented role-based access control (RBAC) with Spatie Permissions, separating customer, mechanic, admin, and staff workflows within a single platform
- Integrated Three.js to render an interactive 3D CVT motorcycle component, allowing customers to visually customize parts before booking
- Implemented PayMongo payment gateway with webhook handling for real-time payment status updates and order confirmation
- Added real-time live dashboards and WebSocket notifications via Pusher and Laravel Echo
- Built a companion Android app using Capacitor, packaging the web app as a native mobile app deployed to production
- Automated queued email notifications and OTP authentication for secure guest access

DC Transport Services dctransport.ogm1.com

Laravel, Vue 3, Tailwind CSS, MySQL, Leaflet.js, OpenStreetMap

- Built and deployed a full-stack van rental booking system for a real family business, handling the complete customer booking lifecycle end-to-end
- Integrated Leaflet.js with OpenStreetMap to calculate route distances and dynamically estimate trip prices across 27 distance bands based on pickup and dropoff locations
- Implemented an admin panel with booking management, in-app quotation generation, and real-time booking status updates
- Designed a guest booking flow with email OTP verification for secure access without requiring account registration

Klori • Calorie Tracker

Flutter, Dart, Riverpod, Laravel, MySQL

- Built a cross-platform nutrition app for iOS and Android with daily calorie and macro tracking (protein, carbs, fat), categorized meal logging, and a recipe builder with live nutrition totals
- Implemented Google, Facebook, and Apple OAuth login and an AI credits system for nutrition insights
- Integrated hydration tracking and daily goal summaries with a clean mobile-first UI in Flutter

R Mo Global Diversity Solutions

React, JavaScript, HTML, CSS, Vercel

- Designed and deployed a multi-page website for a US diversity certification consulting firm covering services, blog, FAQ, team, networking events, and contact
- Built an animated client showcase and integrated a contact form with captcha
- Deployed on Vercel with continuous deployment from GitHub

Personal Portfolio — Denise Dela Cruz den-portfolio-plum.vercel.app

Vue 3, Vite, Vercel, Figma

- Designed and deployed a personal portfolio website for a client, showcasing projects and skills with a clean, responsive UI
- Deployed on Vercel with continuous deployment from GitHub

EDUCATION

Bachelor of Science in Information Technology

National College of Science and Technology

2023 – Expected April 2027
